

# 12.3% More Patients Seen by Implementing ThriveAP

Major healthcare system, 20+ facilities in 45+ counties

Timeline: 1 year

ThriveAP partnered with a major healthcare system to implement transition to practice education, augmenting their APP fellowship program. The organization recognized their APP RVU performance was below the national average. Their goal was to increase clinicians' proficiency by leveraging ThriveAP. Success of the partnership was measured by work RVU production and patients seen. To accurately measure success, data was collected over a 12-month period comparing participants to an equivalent peer benchmark group.

**ThriveAP Participants:** 12 providers, 0-3 years experience, 90 minutes per week (69 hours per year) out of clinic dedicated to ThriveAP

**Peer Benchmark Group:** 15 providers, 0-3 years experience, 90 additional minutes per week (69 hours per year) of time in clinic

## Results Compared to Benchmark Group:

- 9.2% more work RVUs
- 12.3% more patients than the benchmark group in the same amount of work hours
- 3:1 ROI \*based on national collected compensation for APPs in family medicine, without OB MGMA

**9.2%**

### More wRVUs

Resulting in higher revenue than peers & 3:1 program ROI

**12.3%**

### More Patients Seen

Seen over same time period, increasing access to care

**69**

### Less Hours

in clinic compared to peer benchmark group, while driving higher revenue
